SUMMARY

Undergraduate electrical engineering student with project experience in embedded systems, IoT sensor integration, and power system modelling. Comfortable in MATLAB/Simulink for real-time simulation and control, with a focus on building reliable solutions across hardware and software.

WORK EXPERIENCE

Industrial Trainee

June 2024 - July 2024

Indian Oil Corporation Limited — SERPL, Bhubaneswar Pump Station (Jatni)

- Assisted in the maintenance and troubleshooting of electrical systems and equipment at the SERPL, Bhubaneswar Pump Station.
- Gained practical experience with the operation and control of automated pumping systems within the pipelines division.

PROJECTS

Power Grid Cyber-Attack Detection via V-I Correlation

[Link to Project](#)

- Modelled a 5-bus AC transmission network in MATLAB/Simulink with normalised per-unit baselines to calibrate detection thresholds.
- Implemented detect_fdi() classifying system state as Normal / Cyber-Attack / Physical Fault at 50 μ s sample rate using six FDI attack modes and a weighted event-scoring counter.
- Built classify_physical_fault() sub-classifier with four fault codes using RMS buffers and phase-unbalance metrics; detects faults within 150 μ s.

EDUCATION

2023 - present	BTech-Electrical Engineering at Odisha University Of Technology and Research, Bhubaneswar	(CGPA: 8.46/10)
2022	Class 12th CBSE	(88.60%)
2021	Class 10th CBSE	(89.80%)

SKILLS

Technical Skills

Design & Simulation Altium Designer, AutoCAD Electrical, MATLAB & Simulink

Hardware & Embedded Arduino, ESP32, PCB Design

Soft Skills

Problem-Solving, Analytical Thinking, Detail-Oriented, Self-Motivated
